

SEDIMENT CARTRIDGE TANK

SEDIMENT CARTRIDGE TANK

Introducing a lightweight and cost-effective filtration solution designed for various applications. From high-flow commercial and industrial setups to standalone residential point-of-entry (POE) installations for both city and well water, this 100% non-metallic Cartridge Tank is the future of water filtration.

This high-performance device is NSF 44 listed and has been rigorously tested to withstand operating pressures of up to 150 psi, featuring a robust 4:1 burst safety factor. Enjoy peace of mind with a filtration system that meets your needs, no matter the environment.

EASY REPLACEMENTS NO TOOLS REQUIRED

1. PRESS THE RED PRESSURE RELIEF VALVE TO UNSEAT THE RING

2. REMOVE SNAP RING

3. LIFT TOP CAP
